

## TRAINING

### **Introduction to Health & Safety Risk Control**

All companies, no matter how large or small, have risks. Identifying and minimising those risks is a high priority. Introduction to Health & Safety Risk Control is aimed at staff at all levels, to help raise the awareness of these risks and minimise accidents in the work place through corrective actions and prevention.

**Course Duration:** 1 Day

**Venue:** Customer Premises or a location of your choice

**Course Content:**

- Introduction to Legal Background
- Responsibility of the Employee
- Awareness of Health & Safety in the Workplace
- Assessing Risks
- Examples of H&S Risks
- Working at Height
- Risks in Lifting & Handling
- Practical risk assessment exercise.
